

Certificates checklist

- ☐ Are you going to use self-signed certificates? **If yes, ignore the other questions.**
- ☐ Have you prepared the Root certification authority (**ca.crt**) certificate in the .pem format?
- ☐ Does your **ca.crt** include only the Root certificate, without any intermediate ones?
- ☐ Have you prepared the **server.crt** certificate in the .pem format?
- ☐ Have you signed **server.crt** with **ca.crt**?
- ☐ Does your **server.crt** include the end certificate plus all intermediate certs, if exist?
- ☐ Is your server.crt being the SAN certificate?
- ☐ Does your server.crt includes DNS of all deployed servers and all DNS that are additionally assigned to the APP server?
- ☐ Have you prepared the private **server.key** file in the PKCS#8 format for **server.crt**?
- ☐ Have you checked that your **server.key** is NOT protected with password?
