

Hardware checklist for high-availability installation

Select the environment:

☐ Production

Server	Number of servers	CPU	RAM	Disc	File system	OS, specify which...	Prepared (yes/no)?
APP		4	16	150			☐
BEP Agent		8	32	150			☐
BEP Master		4	16	150			☐
BI		4	16	150			☐
INT		4	16	500			☐
MS SQL		4	16	500			☐
OCR		8	16	150			☐
RPA		8	16	150			☐

☐ Development/POC

Server	Number of servers	CPU	RAM	Disc	File system	OS, specify which...	Prepared (yes/no)?
APP		4	16	100			☐
BEP Agent		8	32	150			☐
BEP Master		2	8	150			☐
BI		4	16	150			☐
INT		2	8	150			☐

Server	Number of servers	CPU	RAM	Disc	File system	OS, specify which...	Prepared (yes/no)?
MS SQL		4	16	500			☐
OCR		2	8	150			☐
RPA		8	16	150			☐

☐ Are disk volumes on all servers mounted separately from the root volume of the operating system?

☐ Have you allowed Javascript scripts to run on the BI (Analytics) server?

System updates

☐ Have you verified that your Linux OS has the latest system updates? For that, run `yum check-update`.

Shared file system (production)

Server	OS	Type of file system	Shared disk size	Prepared?
BEP Master and BEP Agents	<install_dir>/vds-data		250 GB	☐
APP and INT servers	<install_dir>/shared		500 GB	☐
